PREFACE

The Children's Bureau has given data for the *National Child Abuse and Neglect Data System (NCANDS), Detailed Case Data Component, 1998*, to the National Data Archive on Child Abuse and Neglect for public distribution. Funding for the project was provided by the Children's Bureau within the U.S. Department of Health and Human Services.

ACKNOWLEDGEMENT OF SOURCE

Authors should acknowledge the National Data Archive on Child Abuse and Neglect and the original collector of the data when they publish manuscripts that use data provided by the Archive. Users of these data are urged to follow some adaptation of the statement below.

The data used in this publication were made available by the National Data Archive on Child Abuse and Neglect, Cornell University, Ithaca, NY, and have been used by permission. Data from the National Child Abuse and Neglect Data System were supplied by state child protective service agencies to the Children's Bureau, the Administration of Children, Youth and Families, U.S. Department of Health and Human Services. Funding for NCANDS was provided by the Children's Bureau. Technical support on NCANDS is provided under contract to the Children's Bureau by Walter R. McDonald & Associates, Inc. The participating state agencies; Walter R. McDonald & Associates, Inc., the Children's Bureau, NDACAN, Cornell University, and their agents and employees bear no responsibility for the analyses, opinions, or interpretations presented here.

PUBLICATION SUBMISSION REQUIREMENT

In accordance with the *NCANDS Terms of Use Agreement* for these datasets, users of these data are required to deposit a copy of any published work or report based wholly or in part on these data with NDACAN. A copy of any completed manuscript, thesis abstract, or reprint should be sent to the National Data Archive on Child Abuse and Neglect, Cornell University, Family Life Development Center, MVR Hall, Ithaca, New York 14853-4401. Such copies will be used to provide funding agencies with essential information about the use of NDACAN resources and to facilitate the exchange of information about research activities among data users and contributors.

Please note: One of the conditions of the *NCANDS Terms of Use Agreement* is that users submit manuscripts to the NCANDS Federal Project Officer **prior** to publication. Please see the *NCANDS Terms of Use Agreement* for details.

Purpose of the 1998 User's Guide Supplement

The *NCANDS DCDC User's Guide Annual Supplement, 1998* is intended for use with the *National Child Abuse and Neglect Data System (NCANDS) Detailed Case Data Component User's Guide and Codebook*. The *User's Guide* contains a general overview of the NCANDS project and detailed descriptions of the variables contained in the J and K files. This *Supplement* contains information specific to the 1998 NCANDS files, *DCDC98_J* and *DCDC98_K*. There are four sections presented in the following order:

- a table indicating whether a state archived data in the years 1995 through 1999
- a table of the total number of records in the *DCDC98_J* and *DCDC98_K* files by state
- counts of the *DCDC98_J* and *DCDC98_K* variables by state
- additional data considerations, if any, conclude the document

History of State Submissions to NCANDS

States began submitting Summary Data Components in 1990 and Detailed Case Data Components in 1995. Black squares in the table cells below indicate years in which individual states submitted DCDCs and gave permission for the data to be contributed to NDACAN.

Please note that some states submit DCDC data, but do not permit these data to be archived with NDACAN. Therefore, these states are not included in the datasets.

1998 File Names and Record Counts

Twelve states archived J and K files in 1998. The combined *DCDC98_J* file contains 14 variables and includes information about all reports of *alleged* maltreatment and all the children involved in these reports. All child fatalities have been excluded from the file. The unit of observation in the file is a report/child pair. There may be, therefore, more than one report per child in the file or more than one child per report. See the *Report and Child Identification Codes* in the *NCANDS User's Guide and Codebook* for more information.

The *DCDC98_K* file contains 62 variables and includes information about all reports of *substantiated* or *indicated* maltreatment, and descriptive information about all the child victims in these reports. All child fatalities have been excluded from the file. The unit of observation consists of a report/child pair.

Table 2. Details of the 1998 NCANDS DCDC

State	J File Record Count		K File Record Count
<i>Colorado</i>	6,375*		6,366*
<i>Delaware</i>	9,578		2,979
<i>Florida</i>	161,741		75,045
<i>Kentucky</i>	62,772		22,035
<i>Louisiana</i>	36,178		11,130

<i>Rhode Island</i>	13,162		3,975
<i>Texas</i>	165,412		41,134
<i>Utah</i>	25,646		7,881
<i>Vermont</i>	2,408		1,059
<i>Wyoming</i>	3,317		1,221
TOTAL	660,081		221,967

*Colorado uses its Central Registry file as the basis for NCANDS reporting and only substantiated cases are included in the Central Registry. Consequently, J and K file counts are very similar.

1998 J File Variable Counts By State

The first column in the following table contains the names of the variables in the J file. Please refer to the *NCANDS User's Guide and Codebook* for more information about specific variables. Subsequent columns contain the number of records with non-missing values for the variable in the state identified in the column heading. The first row, which appears in bold italic, indicates the maximum number of records for the state. Reviewing the table before attempting an NCANDS analysis can be useful. For example, looking down Florida's column, it is apparent that the state did not submit information about the child's Hispanic ethnicity (CHISP) in 1998.

1998 K File Variable Counts By State

The first column in the following table contains the names of the variables in the K file. Please refer to the *NCANDS User's Guide and Codebook* for more information about specific variables. Subsequent columns contain the number of records with non-missing values for the variable in the state identified in the column heading. The first row, which appears in bold italic, indicates the maximum number of records for the state. Reviewing the table before attempting an NCANDS analysis can be useful. For example, looking down Vermont's column, it is apparent that the state did not submit a number of variables in 1998.
