## PREFACE

The year 2000 data for the *Adoption and Foster Care Analysis and Reporting System (AFCARS)* have been given to the National Data Archive on Child Abuse and Neglect for public distribution by the Children's Bureau. Funding for the project was provided by the Children's Bureau, Administration on Children, Youth and Families, Administration for Children and Families, U.S. Department of Health and Human Services. This user's guide orients the user to the AFCARS data for years 2000 and after, and should not be confused with the guide describing AFCARS data from years 1995 to 1999.

## ACKNOWLEDGEMENT OF SOURCE

Authors should acknowledge the National Data Archive on Child Abuse and Neglect and the original collector of the data when they publish manuscripts that use data provided by the Archive. Users of these data are urged to follow some adaptation of the statement below.

The data used in this publication were made available by the National Data Archive on Child Abuse and Neglect, Cornell University, Ithaca, NY, and have been used with permission. Data from the *Adoption and Foster Care Analysis and Reporting System (AFCARS)* were originally collected by the Children's Bureau. Funding for the project was provided by the Children's Bureau, Administration on Children, Youth and Families, Administration for Children and Families, U.S. Department of Health and Human Services. The collector of the original data, the funder, the Archive, Cornell University and their agents or employees bear no responsibility for the analyses or interpretations presented here.

## PUBLICATION SUBMISSION REQUIREMENT

In accordance with the *Terms of Use Agreement* for these datasets, users of these data are required to deposit a copy of any published work or report based wholly or in part on these data with the Archive. A copy of any completed manuscript, thesis abstract, or reprint should be sent to the National Data Archive on Child Abuse and Neglect, Cornell University, Family Life Development Center, MVR Hall, Ithaca, New York 14853-4401. Such copies will be used to provide funding agencies with essential information about the use of NDACAN resources and to facilitate the exchange of information about research activities among data users and contributors.

---

## ABSTRACT

The Adoption and Foster Care Analysis and Reporting System (AFCARS) is a federally mandated data collection system intended to provide case specific information on all children covered by the protections of Title IV-B/E of the Social Security Act (Section 427). Under the final AFCARS' rule, states are required to collect data on all adopted children who are placed by the state's child welfare agency or by private agencies under contract with the public child welfare agency. States are encouraged to report other private adoptions not involving the public welfare agency that are finalized in the state as well. In addition, states are required to collect data on all children in foster care for whom the state child welfare agency has responsibility for placement, care, or supervision.

AFCARS was designed to address policy development and program management issues at both the state and federal levels. The data are also useful for researchers interested in analyzing aspects of the United States' foster care and adoption programs. Tables and other reports summarizing the AFCARS data are available from the Children's Bureau Web site (<http://www.acf.hhs.gov/programs/cb>).

AFCARS' reporting periods extend from October 1 to September 30 of the following year. The National Data Archive on Child Abuse and Neglect distributes two data files for each fiscal year; one file contains adoption data and the other foster care data. Each adoption data file contains 37 elements that provide information on the adopted child's gender, race, birth date, ethnicity and prior relationship with the adoptive parents. The date the adoption was finalized, as well as dates parental rights were terminated, characteristics of birth and adoptive parents, and whether the child was placed from within the United States or from another country are also captured. The foster care data files contain 66 elements that provide information on child demographics including gender, birth date, race, and ethnicity. Information about the number of previous stays in foster care, service goals, availability for adoption, dates of removal and discharge, funding sources, and the biological and foster parents is also included in the foster care files.

## OVERVIEW

### Background

In 1982 the Department of Health and Human Services Administration on Children, Youth and Families, through a grant to the American Public Welfare Association, implemented the Voluntary Cooperative Information System (VCIS) which collected national data on foster care and adoption. The VCIS system had a number of weaknesses including variation from state to state in reporting periods, a lack of common definitions for data elements and services, and inconsistent methodologies in reporting. In addition, the aggregate nature of the data limited both the analyses that could be performed and the data's usefulness for purposes of planning or policy development at the federal and state levels. Due to these weaknesses in the VCIS system, the U.S. Congress set forth to establish an improved, mandatory national reporting system.

In 1986 Congress approved an amendment to Title IV-E of the Social Security Act (Section 479) requiring that an advisory committee be established to prepare a report to Congress and the Department of Health and Human Services (HHS) with recommendations for establishing, administering, and financing a system for collecting data on adoption and foster care in the United States. The advisory committee submitted a final report detailing recommendations for a mandatory system that would collect data on all children covered by the protections of Title IV-B of the Social Security Act (Section 427). On September 27, 1990, HHS published proposed federal regulations to implement the data collection system, which has become known as the Adoption and Foster Care Analysis and Reporting System (AFCARS). On December 22, 1993, the final rule implementing AFCARS appeared in the Federal Register.

### Purpose of AFCARS

The purpose of AFCARS is twofold. First, AFCARS is designed to address policy development and program management issues at both the state and federal levels. Second, the data are useful for research aimed at analyzing such characteristics of the United States' foster care and adoption programs as timing, trends, and populations. It is important to keep in mind, however, that AFCARS was developed as an ongoing data collection system and does not conform to rigorous criteria for scientific research design.

Specific objectives of AFCARS include creation of the following:

- Reliable and consistent data through the use of uniform definitions, methodologies, and data standards.
- Statewide and national information on the number and characteristics of adoptive and foster care children and their parents (biological parents, adoptive parents, and foster care parents).
- Statewide and national information on the status of the foster care population (i.e., type of placement, length of placement, availability for adoption, and goals for ending or continuing care).
- Information on the extent and nature of assistance provided by federal, state, and local adoption and foster care programs.

- Information on the characteristics of the children to whom varying levels of assistance are provided.
- Information on the number and characteristics of children placed in foster care outside of the state that has responsibility.

## Data Collection

Under the final AFCARS rule, states are required to collect case specific data on all adopted children who were placed by the state child welfare agency, by private agencies under contract with the public child welfare agency, or by private adoptions voluntarily reported during the given reporting period. States are also required to collect data on all children in foster care for whom the state child welfare agency has responsibility for placement, care, or supervision, regardless of eligibility for Title IV-E funds. For the states that participated, each fiscal year's AFCARS data provide case-level information for children served by the foster care system and children whose adoptions were finalized from October 1 to September 30 of the following year.

States are required to submit all of their adoption and foster care data electronically to the Children's Bureau at the close of each of two semi-annual reporting periods. The first semi-annual reporting period extends from October 1 through March 31, the second from April 1 to September 30. States submit 37 adoption data elements and 66 foster care data elements. The Children's Bureau combines the state files from the two periods into a single annual database.

The Children's Bureau recodes all dates as separate day, month, and year variables with the result that 37 adoption elements and 66 foster care elements are represented by 60 and 104 variables respectively. The data elements are described in detail in the *Codebook* that follows this *User's Guide*. State-specific footnotes are presented in the *User's Guide Annual Appendix*.

Prior to 1998, data submissions were required; however, fiscal penalties were not applicable, while many states brought their information systems online. Therefore, pre-1998 fiscal year datasets are not as complete or reliable as subsequent datasets. Dramatic improvements in data quality and completeness occurred between 1995 and 1998 and continue to occur as states further develop their electronic information systems and financial penalties are levied for poor quality data.

- Federal Regulations published on January 25, 2000 (65 FR 4019-4093) made technical changes to the race and ethnicity data elements in AFCARS. Under the previous system, race categories were mutually exclusive, with child's race being restricted to an individual racial category. Beginning with AFCARS 2000, a child may be classified as being of a single race or multiple races, or may receive a categorization of "unable to determine" if the child is very young or severely disabled and no other person is available to identify the child's race.

### ***Creation of the Adoption Files***

Adoptions such as the following **must** be reported to AFCARS and are included in the adoption files:

- Children placed for adoption by the public child welfare agency.
- Children who have been in the public foster care system and were placed for adoption by a private agency under contract with the public child welfare agency.

- Children in whose adoption the public child welfare agency was involved but who had not been in the public foster care system (e.g., children who received Title IV-E funds for non-recurring costs of adoption).

Other adoptions, such as those involving children who were not in the public foster care system and were placed for adoption by tribal or private agencies, are voluntarily reported to AFCARS. These adoptions do not involve a state agency and are not included in the publicly available version of the data.

States submit data for each child with a finalized adoption. Duplicate records are removed and the remaining records are sorted by the year that the adoption was finalized.

Please note that the actual electronic data transmission for many adoptions finalized in a fiscal year may not occur until a subsequent year. Consequently, data submissions in subsequent years may contain data from a number of earlier adoptions. To the extent possible, such transmissions are included in the data file for the year in which the adoption was finalized, but the adoption count should not be considered an absolute, final count. These late submissions will lead to small increases in the final count of adoptions in a state. Releases of new versions of the datasets include the updated data.

A matching program is used to remove duplicate records. However, the adoption file does not contain geographic Federal Information Processing Standard (FIPS) code information or the child's day of birth, and consequently it can be difficult to discriminate between records that are truly duplicates and those that are merely very similar. Duplicate records are not distributed evenly among states; researchers interested in state-specific analyses may wish to request the duplicated adoption file from NDACAN to review the records that were dropped by the matching program.

### ***Creation of the Foster Care Files***

As long as a child is in foster care, the state must submit an AFCARS record for every report period during which the child is in care. When the child is discharged from foster care, the state submits the child's record for that report period, along with the discharge information.

Only one record per foster care child is included in the annual database. The database includes only the most recent record received for each child served. If a child has a record in both periods, the record from the second period will be retained. A child who is in care or comes into care at the start of the year, exits care, and then later returns to care in the second half of the year, will have one record in the annual database, the one submitted in the second report period when the child returned to care.

It is possible that foster care entries and discharges for the fiscal year under review may not be submitted by a state until after the close of the fiscal year. To minimize an undercount of entries and discharges, these records are identified in the data from the first period of the subsequent fiscal year and included in the dataset for the period in which they belong.

By AFCARS regulation, states were required to submit AFCARS data beginning in 1995. It was not until 1998, however, that penalties established by the same regulation became applicable. Data submitted prior to 1998 were often incomplete. The table below indicates the years in which individual states submitted data. Please note that a black dot in a cell below does not imply that a state's data file was complete; some state files contained very few records. The number of records in each state's files is contained in the *State Records Counts Table* for the year. 2001 was the first year that all states (including Puerto Rico and the District of Columbia) submitted data. Since then, all states have submitted data each year.

To produce the annual database of foster care records, the Children's Bureau first compares the information sent by states for the October through March and the April through September reporting periods in that fiscal year. On a state-by-state basis, the Children's Bureau creates interim extract files by matching case records across the two reporting periods. Through matching and extraction, an unduplicated annual file is created for each state. The state files are then combined to create the annual database.

## Confidentiality Protections for Children in the AFCARS

Before distributing the AFCARS data, NDACAN makes two manipulations to the foster care data to protect the privacy of the children in foster care. First, geographic FIPS codes for the children from counties with fewer than 1,000 records in the annual database are recoded 8 to indicate *Not provided for reasons of confidentiality*. Second, each child's day of birth is recoded as the first day of the week

of birth. For example, children born from the eighth through the fourteenth day of May in 2000 will all have a birth date of 5/08/2000.

Adopted children's county FIPS codes and days of birth are not reported to AFCARS. Therefore, no adjustments are necessary to assure the confidentiality of the adoption file data.

## NDACAN Data Versions

Each NDACAN version of the files contains the most complete and accurate data that are available at the time of release. Version 1 data are drawn from the annual database, the creation of which is described above. Under certain circumstances, however, states have the option of submitting corrected data to the Children's Bureau after a required reporting date. In such cases subsequent versions of the data will contain more accurate information.

## State Footnotes

In addition to the required data elements states are encouraged (but not required) to include footnotes with their data submissions. The footnotes allow states to provide additional information they deem vital to the interpretation of their data. Footnotes may include the following:

- General characteristics of the state's adoption and foster care system.
- Characteristics of the population, such as whether certain types of placements are included.
- State definitions that vary from federal AFCARS definitions.
- Explanations for data counts such as the number of deaths in foster care, the number of children with disabilities, or the number of children in types of institutional settings.

More information about the technical implementation of AFCARS can be found at:  
[http://www.acf.hhs.gov/programs/cb/stats\\_research/index.htm](http://www.acf.hhs.gov/programs/cb/stats_research/index.htm)

---

## DESCRIPTION OF THE DATA FILES

NDACAN distributes these data as SAS transport or SPSS portable files. Other file formats and data subsets can be prepared by special request. Please contact NDACAN for more information.

### File Characteristics

NDACAN distributes two files for each fiscal year of data collection. Brief descriptions of the data files are provided below. For information regarding variables, please refer to the codebook information sections of this guide. In each file the child is the unit of analysis.

#### ***Adoption files***

Files containing adoption data are named *AD<year>v<version number>* where *<year>* is the 4-digit fiscal year in which the data were collected and *<version number>* is the NDACAN file version number. The file named *AD2000v2* would therefore contain the second version of fiscal year 2000's adoption data. Each adoption data file contains 60 variables (representing 37 elements) and a varying number of cases from states each year. The file contains information on child demographics, including gender, birth, race, and ethnicity, as well as some information on disability or special needs of the child, funding sources, dates parental rights were terminated, and information on the adoptive parents.

#### ***Foster Care files***

Files containing foster care data are named *FC<year>v<version number>* where *<year>* is the 4-digit fiscal year in which the data were collected and *<version number>* is the NDACAN file version number. The file named *FC2000v2* would therefore contain the second version of fiscal year 2000's foster care data. The foster care data files contain 104 variables (representing 66 elements) and a varying number of cases from a varying number of reporting states each year. Variables include child demographics such as gender, birth, race, and ethnicity, as well as the number of previous stays in foster care, service goals, availability for adoption, dates of removal and discharge, funding sources and information on the biological and foster parents.

The data included are those for the most recent removal. As illustrated in the *Timeline of Entrance and Exits from Foster Care* which follows, REM1, the date of the first removal, will not change regardless of how many times the child enters and exits care. LATREM, the latest removal date and DLSTFC, the discharge date for the last episode, will change with each episode. DODFC, the date of discharge from foster care, will be missing if the child is in care at the end of the reporting period. DODFC discharge information entered at the conclusion of earlier stays in care are reset to missing if a child re-enters care.

## Timeline of Entrances and Exits from Foster Care

**REM1 = first removal date**  
**LATREM = latest removal date**  
**DLSTFC = discharge date for previous episode**  
**DODFC = discharge date from foster care**

## Notes Regarding the Data Files

In using these data, one should be aware of the following:

In the unduplicated adoption data files, each record should represent a unique child whose adoption was finalized during that fiscal year. Upon request NDACAN will provide a file containing duplicated data. There is some duplication in the foster care files, primarily among the discharge records; however, it is estimated to be less than 2%.

While every effort has been made to create the cleanest, most reliable and up-to-date AFCARS datasets as possible, anomalies still exist in the data. Users are encouraged to examine overall and by state frequencies of the data elements they are using in their analyses.

The state footnotes associated with each state should always be taken into account when utilizing a state's data. Footnotes for elements arranged by state can be found in the *AFCARS User's Guide Annual Appendixs*.

Differing state policies have an impact on how information is categorized and reported and any attempt to compare states should be sensitive to these differences. Differences in ethnic and racial classifications are an important example.

**Please contact NDACAN directly if you have questions  
or encounter problems using these datasets.**

## BIBLIOGRAPHY

The following references are not meant to be an exhaustive or representative list of documents produced from and related to the dataset. They are meant to provide the researcher with a starting point from which to begin an investigation of relevant aspects of the data.

## CODEBOOK: AFCARS FILE INFORMATION

The Codebook consists of six sections. The first two sections are lists of the variables in the adoption files, which are first listed in alphabetical order and then in the order in which they appear in the data files. The third section contains a detailed description of the adoption variables arranged in the order in which they appear in the AFCARS adoption files. This three-part sequence is repeated for the foster care variables in sections four through six.

In the descriptive sections for both the adoption and foster care files variable names, variable labels, and variable formats are provided on the first line. Variable values and their corresponding labels are listed as appropriate.

## AFCARS Adoption File: Variable Information

The variables below are arranged in the order in which they appear in the data file. The first line in the description of each variable contains the name in capital letters, the position in the file, and the variable label. The data type is listed in italics below the variable name. When applicable, explanatory text or value labels follow.

<i>Element</i>	<i>Name</i>	<i>Variable Information</i>						
<b>01</b> <i>NUM</i>	<b>STATE</b>	<b>State</b> Identity of the state reporting on the record. Use the two-digit Federal Information Processing Standards (FIPS) code for the state.						
<b>02y</b> <i>NUM</i>	<b>REPDATYR</b>	<b>Report End Date, Year</b> The last year for the reporting period.						
<b>02m</b> <i>NUM</i>	<b>REPDATMO</b>	<b>Report End Date, Month</b> The last month for the reporting period.						
<b>03</b> <i>CHAR</i>	<b>RECNUM</b>	<b>Record Number</b> The sequential number that the state uses to transmit data to the Department of Health and Human Services (HHS) or a unique (encrypted) number that follows the child as long as he or she is in foster care. Encrypted values may appear garbled in the data file; this is not an error. The record number cannot be linked to the child's case ID number except at the state or local level.						
<b>04</b> <i>NUM</i>	<b>AGNYINVL</b>	<b>State Agency Involvement</b> Indicate whether the state Title IV-B/IV-E agency had any involvement in the adoption, that is, whether the adopted child belongs to one of the following categories: (1) a child who had been in foster care under the responsibility and care of the state child welfare agency and who was subsequently adopted whether special needs or not and whether a subsidy was provided or not; (2) a special needs child who was adopted in the state, whether or not he/she was in the public foster care system prior to his/her adoption and for whom non-recurring expenses were reimbursed; or (3) a child for whom an adoption assistance payment or service is being provided based on arrangement made by or through the state agency.  <table border="0"> <thead> <tr> <th><i>Value</i></th> <th><i>Label</i></th> </tr> </thead> <tbody> <tr> <td>1</td> <td>Yes (Publicly available data contain only adoptions through state)</td> </tr> <tr> <td>2</td> <td>No</td> </tr> </tbody> </table>	<i>Value</i>	<i>Label</i>	1	Yes (Publicly available data contain only adoptions through state)	2	No
<i>Value</i>	<i>Label</i>							
1	Yes (Publicly available data contain only adoptions through state)							
2	No							
<b>05y</b> <i>NUM</i>	<b>DOBYR</b>	<b>Child Date Of Birth, Year</b> Year of the child's birth. If the child is abandoned or the date of birth is otherwise unknown, enter an approximate date of birth.						
<b>05m</b> <i>NUM</i>	<b>DOBMO</b>	<b>Child Date Of Birth, Month</b> Month of the child's birth. If the child is abandoned or the date of birth is otherwise unknown, enter an approximate date of birth.						
<b>06</b> <i>NUM</i>	<b>SEX</b>	<b>Child Sex</b> The gender of the person.

		qualified professional).
		<i>Value</i> <i>Label</i>
		0              No
		1              Yes
<b>15</b> <i>NUM</i>	<b>OTHRMED</b>	<b>Other Diagnosed Condition</b> Conditions other than those noted in AFCARS under types of medical conditions or disabilities (mental retardation, visually or hearing impaired, physically disabled, emotionally disturbed) which require special medical care such as chronic illnesses. Included are children diagnosed as HIV positive or with AIDS. (Clinical diagnosis by a qualified professional).
		<i>Value</i> <i>Label</i>
		0              No
		1              Yes
<b>16</b> <i>NUM</i>	<b>DOBYRMOM</b>	<b>Mother Year Of Birth</b> Year that birth mother was born. AFCARS adoption data elements ask for these data on the birth parent(s) and adoptive parent(s). If the child was abandoned and no information was available on either one or both parents, leave blank for the parent(s) for which no information was available.
<b>17</b> <i>NUM</i>	<b>DOBYRDAD</b>	<b>Father Year Of Birth</b> Year that birth father was born. AFCARS adoption data elements ask for these data on the birth parent(s) and adoptive parent(s). If the child was abandoned and no information was available on either one or both parents, leave blank for the parent(s) for which no information was available.
<b>18</b> <i>NUM</i>	<b>MOMARRD</b>	<b>Mother Married</b> For adoption data, indicate whether the birth mother was married at time of child's birth; include common law marriage if legal in the state.
		<i>Value</i> <i>Label</i>
		0              Not applicable
		1              Yes
		2              No
		3              Unable to determine (The child was abandoned and no information was available on the mother.)
<b>19y</b> <i>NUM</i>	<b>TPRMOMYR</b>	<b>TPR Mother, Year</b> The year that the court terminated the mother's parental rights. If the mother is known to be deceased, enter the date of death.
<b>19m</b> <i>NUM</i>	<b>TPRMOMO</b>	<b>TPR Mother, Month</b> The month that the court terminated the mother's parental rights. If the mother is known to be deceased, enter the date of death.
<b>19d</b> <i>NUM</i>	<b>TPRMOMDA</b>	<b>TPR Mother, Day</b> The day that the court terminated the mother's parental rights. If the mother is known to be deceased, enter the date of death.
<b>20y</b> <i>NUM</i>	<b>TPRDADYR</b>	<b>TPR Father, Year</b> The year that the court terminated the father's parental rights. If the father is known to be deceased, enter the date of death.

<i>Element</i>	<i>Name</i>	<i>Variable Information</i>														
20m <i>NUM</i>	TPRDADMO	<b>TPR Father, Month</b> The month that the court terminated the father's parental rights. If the father is known to be deceased, enter the date of death.														
20d <i>NUM</i>	TPRDADDA	<b>TPR Father, Day</b> The day that the court terminated the father's parental rights. If the father is known to be deceased, enter the date of death.														
21y <i>NUM</i>	FINADPYR	<b>Date Adoption Legalized, Year</b> The year the court issued the final adoption decree.														
21m <i>NUM</i>	FINADPMO	<b>Date Adoption Legalized, Month</b> The month the court issued the final adoption decree.														
21d <i>NUM</i>	FINADPDA	<b>Date Adoption Legalized, Day</b> The day the court issued the final adoption decree.														
22 <i>NUM</i>	ADPFAMST	<b>Adoptive Family Structure</b> Select from the four alternatives -- married couple, unmarried couple, single female, single male -- the category which best describes the nature of the adoptive parent(s) family structure. If response is "1" or "2," enter data in both elements 23 and 24. If response is "3" or "4," enter data only for the appropriate parent in elements 23 and 24.  <table border="1"> <thead> <tr> <th><i>Value</i></th> <th><i>Label</i></th> </tr> </thead> <tbody> <tr> <td>0</td> <td>Not applicable</td> </tr> <tr> <td>1</td> <td>Married couple</td> </tr> <tr> <td>2</td> <td>Unmarried couple</td> </tr> <tr> <td>3</td> <td>Single female</td> </tr> <tr> <td>4</td> <td>Single male</td> </tr> <tr> <td>5</td> <td>Unable to determine</td> </tr> </tbody> </table>	<i>Value</i>	<i>Label</i>	0	Not applicable	1	Married couple	2	Unmarried couple	3	Single female	4	Single male	5	Unable to determine

## AFCARS Foster Care File: Variable Information

The variables below are arranged in the order in which they appear in the data files. The first line in the description of each variable contains the name in capital letters, the position in the file, and the variable label. The data type is listed in italics below the variable name. When applicable, explanatory text or value labels follow.

<i>Element</i>	<i>Name</i>	<i>Variable Information</i>						
<b>01</b> <i>NUM</i>	<b>STATE</b>	<b>State</b> Identity of the state reporting on the record. The 2-digit Federal Information Processing Standards (FIPS) code for the state is used.						
<b>02y</b> <i>NUM</i>	<b>REPDATYR</b>	<b>Report End Date, Year</b> The last year for the reporting period.						
<b>02m</b> <i>NUM</i>	<b>REPDATMO</b>	<b>Report End Date, Month</b> The last month for the reporting period. 03 and 09 are the only allowable values.						
<b>03</b> <i>NUM</i>	<b>FIPSCODE</b>	<b>Local Agency FIPS Code</b> Identity of the county or equivalent unit that has responsibility for the case. The 5-digit Federal Information Processing Standard (FIPS) must be used. To protect the privacy of the children in regions with fewer than 1,000 records in the annual database, the FIPS code in such cases has been replaced with a value of 8.  <table border="0"> <tr> <td><i>Value</i></td> <td><i>Label</i></td> </tr> <tr> <td>8</td> <td>Not provided for reasons of confidentiality</td> </tr> <tr> <td>9</td> <td>Missing</td> </tr> </table>	<i>Value</i>	<i>Label</i>	8	Not provided for reasons of confidentiality	9	Missing
<i>Value</i>	<i>Label</i>							
8	Not provided for reasons of confidentiality							
9	Missing							
<b>04</b> <i>CHAR</i>	<b>RECNUMBR</b>	<b>Record Number</b> The sequential number that the state uses to transmit data to the Department of Health and Human Services (HHS) or a unique (encrypted) number which follows the child as long as he or she is in foster care. Encrypted values may appear garbled in the data file; this is not an error. The record number cannot be linked to the child's case ID number except at the state or local level.						
<b>05y</b> <i>NUM</i>	<b>PEDREVYR</b>	<b>Review Date, Year</b> If Date of Latest Removal From Home (element 21) is less than nine months prior to the Report Period Ending Date (element 2), then the Review Date may be left blank. If Date of Latest Removal From Home (element 21) is greater than nine months from Report Date (element 2) then the Review Date must not be more than nine months prior to the Report Date (element 2).						
<b>05m</b> <i>NUM</i>	<b>PEDREVMO</b>	<b>Review Date, Month</b> If Date of Latest Removal From Home (element 21) is less than nine months prior to the Report Period Ending Date (element 2), then the Review Date may be left blank. If Date of Latest Removal From Home (element 21) is greater than nine months from Report Date (element 2) then the Review Date must not be more than nine months prior to the Report Date (element 2).						

<p><b>05d</b> <i>NUM</i></p>	<p><b>PEDREVDA</b></p>	<p><b>Review Date, Day</b>                  If Date of Latest Removal From Home (element 21) is less than nine months prior to the Report Period Ending Date (element 2), then the Review Date may be left blank.                  If Date of Latest Removal From Home (element 21) is greater than nine months from Report Date (element 2) then the Review Date must not be more than nine months prior to the Report Date (element 2).</p>										
<p><b>06y</b> <i>NUM</i></p>	<p><b>DOBYR</b></p>	<p><b>Child Birth Date, Year</b>                  Year of child's birth. If the child is abandoned or the date of birth is otherwise unknown, an approximate date of birth is entered.</p>										
<p><b>06m</b> <i>NUM</i></p>	<p><b>DOBMO</b></p>	<p><b>Child Birth Date, Month</b>                  Month of child's birth. If the child is abandoned or the date of birth is otherwise unknown, an approximate date of birth is entered.</p>										
<p><b>06d</b> <i>NUM</i></p>	<p><b>DOBDA</b></p>	<p><b>Child Birth Date, Day</b>                  Day of child's birth. If the child is abandoned or the date of birth is otherwise unknown, the 15th day of the month is used. To protect the confidentiality of children in foster care, this variable has been recoded so that all possible days are collapsed into 4 values. The first day of each week in a month (1, 8, 15, 22) has been preserved so that month/day/year birth variables may be combined into a single variable with a date format.</p> <table border="0" style="margin-left: 40px;"> <thead> <tr> <th style="text-align: left;"><i>Value</i></th> <th style="text-align: left;"><i>Label</i></th> </tr> </thead> <tbody> <tr> <td>1</td> <td>1st through the 7th day</td> </tr> <tr> <td>8</td> <td>8th through the 14th day</td> </tr> <tr> <td>15</td> <td>15th through the 21st day</td> </tr> <tr> <td>22</td> <td>22nd through the 31st day</td> </tr> </tbody> </table>	<i>Value</i>	<i>Label</i>	1	1st through the 7th day	8	8th through the 14th day	15	15th through the 21st day	22	22nd through the 31st day

At least one Reason for Removal (elements 26 through 40) must have a value of "1."  <i>Value      Label</i>                        0      No                        1      Yes</p>
<p><b>40</b> <i>NUM</i></p>	<p><b>HOUSING</b></p>	<p><b>Reason for Removal: Inadequate Housing</b>                  As a condition associated with a child's removal from home and contact with the foster care system, housing facilities were substandard, overcrowded, unsafe or otherwise inadequate resulting in their not being appropriate for the parents and child to reside together. Also includes homelessness. At least one Reason for Removal (elements 26 through 40) must have a value of "1."  <i>Value      Label</i>                        0      No                        1      Yes</p>
<p><b>41</b> <i>NUM</i></p>	<p><b>CURPLSET</b></p>	<p><b>Current Placement Setting</b>                  Identify the type of setting in which the child currently lives. Types of settings include: pre-adoptive home, foster family home (relative), foster family home (non-relative), group home, institution, supervised independent living, runaway, trial home visit. If Current Placement Setting (element 41) is a value that indicates that the child is not in a foster family or a pre-adoptive home, then elements 49 through 55 must be "0."</p>

<i>Value</i>	<i>Label</i>
1	Pre-adoptive home (A home in which the family intends to adopt the child. The family may or may not be receiving a foster care payment or an adoption subsidy on behalf of the child).
2	Foster family home, relative (A licensed or unlicensed home of the child's relatives regarded by the state as a foster care living arrangement for the child).
3	Foster family home, non-relative (A licensed foster family home regarded by the state as a foster care living arrangement).
4	Group home (A licensed or approved home providing 24-hour care for children in a small group setting that generally has from seven to twelve children).
5	Institution (A child care facility operated by a public or private agency and providing 24-hour care and/or treatment for children who require separation from their own homes and group living experience. These facilities may include: child care institutions; residential treatment facilities; maternity homes; etc.)
6	Supervised independent living (An alternative traditional living arrangement where the child is under the supervision of the agency but without 24-hour adult supervision, is receiving financial support from the child welfare agency, and is in a setting which provides the opportunity for increased responsibility for self care).
7	Runaway (The child has run away from the foster care setting).
8	Trial home visit (The child has been in a foster care placement but, under state agency supervision, has been returned to the principal caretaker for a limited and specified period of time).

**CASEGOAL**

**Most Recent Case Plan Goal**

Indicate the most recent case plan goal for the child based on the latest review of the child's case plan -- whether a court review or an administrative review. If the child has been in care less than six months, enter the goal in the case record as determined by the caseworker.

- | <i>Value</i> | <i>Label</i>  |
|--------------|---|
| 1            | Reunify with parent, principal caretaker (The goal is to keep the child in foster care for a limited time to enable the agency to work with the family with whom the child had been living prior to entering foster care in order to reestablish a stable family environment).                                    |
| 2            | Live with other relatives (The goal is to have the child live permanently with a relative or relatives other than the ones from whom the child was removed. This could include guardianship by a relative(s)).  |
| 3            | Adoption (The goal is to facilitate the child's adoption by relatives, foster parents or other unrelated individuals).  |
| 4            | Long-term foster care (Because of specific factors or conditions, it is not appropriate or possible to return the child home or place her or him for adoption, and the goal is to maintain the child in a long term foster care placement).   |
| 5            | Emancipation (Because of specific factors or conditions, it is not appropriate or possible to return the child home, have a child live permanently with a relative or have the child adopted; therefore, the goal is to maintain the child in a foster care setting until the child reaches the age of majority). |
| 6            | Guardianship (The goal is to facilitate the child's placement with an agency or unrelated caretaker, with whom he or she was not living prior to entering foster care, and whom a court of competent jurisdiction has designated as legal guardian).  |
| 7            | Case plan goal not yet established (No case plan goal has been established other than the care and protection of the child).  |
